

Zhilinskaia Elena

Frontend developer (Vue | TypeScript)

zhilinskaia.elena@gmail.com • +79218866841 • <https://www.linkedin.com/in/elena-zhilinskaia/> • @StoneLily (telegram)
Github: StoneLycoris (Elena Zhilinskaia) <https://stonelycoris.github.io/zhilinskaia-cv/>

Frontend developer 4+ years of experience | Vue, TypeScript, JavaScript, Nuxt | I develop scalable, high-performance web applications. I specialize in frontend architecture, performance optimization, web security, UI systems, and delivering an excellent user experience.

Experience

IT-Expertise (Software Development & Information Security)

Moscow, Russia

Frontend Developer

Nov 2024 – Nov 2025

Summary: designed the frontend architecture and core UI modules for a cybersecurity platform, improving product performance, scalability, and stability.

- Designed and implemented a Feature-Sliced Design (FSD) architecture, improving frontend scalability and maintainability.
- Developed and scaled a custom Vuetify-based UI kit (design system), ensuring UI consistency and faster feature delivery.
- Built and optimized data-heavy tables and dashboards (14k+ rows), reducing render time and improving UX for large datasets.
- Improved performance (code splitting, lazy loading, debounce): -23% initial bundle size, -18% LCP.
- Increased test coverage from ~19% to ~61% and reduced regressions by ~29% by implementing unit, integration, and e2e tests (Vitest).
- Enhanced frontend security (XSS protection, sanitization, strict validation, safe DOM/API handling), reducing vulnerabilities by ~41% (pentest).

FlyCode (Web Services, Corporate Intranet Systems & Customer Portals)

Tambov, Russia

Frontend Developer

Jan 2022 – July 2024

Summary: developed new SPA applications with Vue 3 and scaled existing Vue 2 projects, accelerating time-to-market while improving UX metrics.

Project: Beauty & Wellness Calendar

- Initiated and delivered a SPA from scratch (Vue 3, TypeScript, Pinia).
- Reduced scheduling errors by ~24% by implementing advanced date logic (RRule, Vue DatePicker).
- Added i18n support (5 languages) and centralized HTTP error handling with user-friendly notifications.
- Implemented passwordless token-based authentication with email-based access recovery.

Project: Freight Transportation Marketplace

- Extended the vehicle management module (non-standard models/dimensions), increasing business case coverage by ~26%.
- Maintained and refactored legacy code, reducing technical debt.

Demis Group (Web Development & SEO)

Tambov, Russia

Frontend Developer

June 2021 – Dec 2021

Summary: developed responsive interfaces and optimized web projects, improving performance, accessibility, and SEO

- Developed responsive, accessible (WCAG AA) interfaces, improving accessibility score from 34 to 62.
- Enhanced website performance, ensured cross-browser compatibility, and improved core SEO metrics.
- Set up and maintained web analytics (Yandex.Metrica, Google Analytics).

Education

Bachelor's Degree in Asian Studies, HSE University

Russia, 2020

Minor: Data Processing, Data Analysis & Machine Learning, HSE University Saint Petersburg

Skills & Languages

Frontend: Vue 3 Composition API, TypeScript, Pinia, Vue Router, Nuxt 3, Vitest, Vite

Additionally: Vue 2 Options API, JavaScript (ES6+), Vuex, Nuxt 4, Webpack, Jest, Playwright, HTML, CSS, Vuetify, Tailwind, REST API, gRPC, GraphQL, WebSocket, TanStack Query, VueUse, Git, Docker, Figma, Swagger, Histoire, Storybook, ESLint, Prettier
Core concepts: Frontend Architecture, Clean Code, Performance Optimization, System Design, Web Security, UI/UX, CI/CD, Scrum, Agile

English, C1
